

# Precautions After Laser Toning

## After the Procedure:

- There may be temporary swelling, redness, or pain after the procedure.
- Small scabs may appear after laser treatment. They will naturally fall off after 1-2 weeks, so do not attempt to remove them forcibly.
- It's advisable to avoid scrubbing, peeling, or exfoliating for about 2 weeks after the procedure.
- Gentle washing is possible from the same day.
- Please avoid hot baths, saunas, sweating, intense exercise, or massages for about a week.
- It is possible the treated area may temporarily look darker, the discoloration will gradually fade over time.
- Please use sunscreen regularly, it is essential to avoid direct sunlight without sunscreen after laser treatment.
- Depending on the type of laser, repeated procedures can be recommended by doctor at intervals of 1-4 weeks. Please be noted the cycle of laser treatments significantly affects the effectiveness, so please follow the recommended schedule to achieve and maintain the ideal results.
